Nano is a handy desktop reference tool that gives you access to different English resources.

Nano's dictionary includes more than 70,000 definitions, word classes, translations, example sentences and word families. Images from Google illustrate the meaning of words. British and American voices pronounce the words. Nano includes a mini-game gadget you can use to review the vocabulary you store in My Words.

Input any word into the text box of the toolbar and press "Enter". The word's definition, word class, translation, sample sentences and word family will appear in the popup. A matching image from Google images will also be shown.

If the input word has more than 1 sense, you can use the combo box to review different senses of the word.

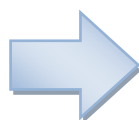

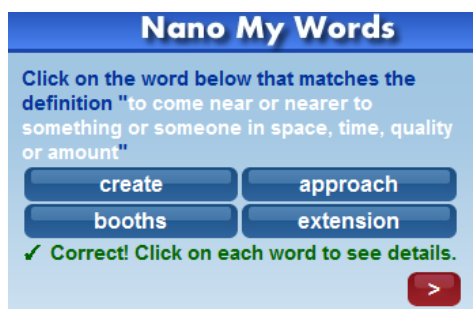

To find more resources, click on 'Resources' and select the resource you want. The resource will be shown in a popup browser.

Click on the sound button to listen to the pronunciation :

Play a mini game in Nano My Words:  
After playing the game, you can click on each word to see information about the word.

Your feedback is very welcome!
